THE 1967

*Continental*

*THE ALL TIME CLASSIC!* Continental proved a classic the year it was introduced. Since then many others have tried to equal its dignity, spaciousness and conveniences. Let them try! They just seem to equal its beauty and universal appeal to the outdoor family. What's its secret? Maybe it's the feeling of happiness when you know that it's what's underneath that counts. Maybe it's the screen door, the breezy feeling of outdoors through the picture window. Or maybe it's the feeling of having the world watch you as you set it up in minutes. What ever it is, the Continental is the pace setter for the camping family. Ask to see it now at your dealer's.

## TRANS-WORLD EXPEDITION SUCCESSFULLY COMPLETES AROUND-THE-WORLD JOURNEY!

Mr. Harold Stephens, writer, lecturer and adventurer, successfully completed an "around the world" expedition upon his arrival, October 25, 1966, in New York City; completing the longest known auto-camper trip ever attempted. The expedition left New York City on March 25, 1965, and traveled through 39 countries, (40,000 road miles) in 19 months. The expedition collected hundreds of still photos and thousands of feet of movie film and travel information for use in future lecture tours and feature articles for national magazines. The expedition utilized a TRADE WINDS camper throughout Western Europe, Africa, Middle East, India, Pakistan, Malaysia, Australia, and Central America. The TRADE WINDS camper served as a rolling home during the night,

and a transport unit during the day for vital equipment and supplies. Periodical reports from the expedition were utilized by TRADE WINDS engineers in improving campers for America's camping families. The data was used to design the campers described in this brochure to provide the maximum structural stability and long life. The exhaustive travel of this unit through some of the world's worst roads, trails, deserts and mountains; from the searing heat of the Sahara to the snow covered heights of the Himalaya Mountains; has proven that TRADE WINDS campers are built stronger to last longer.

This is your assurance that the TRADE WINDS of your choice has been thoroughly tested and proven, and will perform to your satisfaction in any area in which you desire to travel.

**TRADE WINDS CAMPERS, Inc.**  
MANAWA, WISCONSIN 54969

**PORTABLE KITCHEN UNIT:** Consists of two burner propane stove with tilt-up shield, 12' rubber hose with fittings, sink with basket, drain hose, double action hand pump with hose and 5 gallon portable water tank. May be used with all models; standard equipment on Catalina. May be used inside during inclement weather or outside, under the canopy, during fair weather. Lightweight, sturdy and easily moved about.

**TABLE and CUSHIONS:** Large 35" x 45" table of fiberglass construction, may be used outside of the camper or inside. Converts into a third bed at night. The cushions are full 3-inch thick polyfoam, vinyl covered, and convert into a lounge when the table is outside. Standard equipment in the Catalina; optional in other models.

**CANOPY:** Provides additional living area and protection from the elements. Available for all models; Size: 7'6" x 11'3", includes 3 poles, four 12 inch stakes, and 4 ropes.

**ICE BOX:** Standard on Catalina; optional on other models. 2.5 cubic ft. capacity, fully insulated and easy to clean. Permanently installed, it is accessible from outside when traveling.

**SCREENED PATIO WALLS:** Additional beautiful living area with zip-up windows. Zipper door. Walls zip onto underside of canopy and to side of tent. Gives a complete enclosure. Also available with a zip in floor as an additional feature.

**HEATER:** American Gas Association approved bottled gas heater. Sealed combustion chamber, thermostat controlled for maximum safety. 9,000 BTU input available for Catalina, Samoa, and Continental only. 8,000 BTU available for Caprice and Cavalier.

**BOAT RACK:** Sturdily constructed rack is detachable. Light weight and will securely hold boats up to 15 feet long. Available for all models.

Accessories offered for use with your TRADE WINDS camper provide for even greater pleasure and more comforts in various climates. Your dealer can provide accessories either at initial purchase or at a later date.
